

# DINAMIK FLOW TEKNOLOGI

Bring Right Technology to Your Total Solution

We proud to offer you a total solution for your fluid engineering problem through our technical experience and expertise.

[www.dft.co.id](http://www.dft.co.id)

# COMPANY INTRODUCTION

PT. Dinamik Flow Teknologi [DFT] , started its business operations in 2000 focusing on the distribution of water treatment products, industrial pumps, and hydraulic and lubrication system.

Along the way, foremost products that become the main-priority of DFT which includes dosing & sensors in water treatment, fire pumps, filter systems, booster pump, industrial sealing (mechanical seal, gland packing, and gasket), electrical panels, valves, and accessories that support these industrial sectors.

# DEVELOPMENT

## WIDEN PRODUCTS & SERVICES

To offer a real cost-effective solution for industrial needs, we deliver not only a product, but also after-sales services. Our technical team will assist you with on-site services to offer you a total solution. We have been established our branch office in Surabaya, and Pekanbaru since 2010.

### Our Mission

To become a reliable partner in increasing efficiency and productivity for our customers

### Our Vision

Providing solutions and applying the right technology in enhancing partnerships for our customers.

# INNOVATION

## BUILD FACILITIES AND CUSTOMER SUPPORT

From the beginning of 2021, we have organized digital activities such as rebranding, web-development, and system integration so that our customer can reach us faster and comfortably. We are putting our customers first in deliver a total their needs efficiently and effectively.

# ABOUT US

## JAKARTA

Jl. Pangeran Jayakarta 141 Blok C No. 1, Jakarta Pusat - Indonesia 10730

## SURABAYA SALES & SERVICE

Pergudangan Meiko 3 Blok B-39, Kel. Betro Kec. Sedati, Kab. Sidoarjo, Jawa Timur Indonesia 61253

## PEKAN BARU

Jl. Pelajar Gg. Pelajar I No. 23, Kel. Perawang Kec. Tualang Siak Sri Indrapura Indonesia 28772

# INDUSTRIES WE SERVE

Agriculture & Irrigation  
Ballast Water & Dredging  
Chiller & Boiler  
Clean Water Distribution  
Pulp & Paper  
Steel Works  
Chemical Dosing Pump  
Water Treatment  
Food Processing & Pharmacy  
Factory Utility  
Power Generation  
Dewatering Pump for Mining

# OUR CORE VALUES

## Trust in Relationship

We are committed to build strong and lasting relationship with our customers and suppliers that founded on integrity and mutual benefit.

## Accountability Checked

Our teams, professional marketing and service department are at your disposal to assist you throughout the project completeness.

## Cost Effectiveness

We provide appropriate and effective product solutions so that customers get cost efficiency to maximize operational productivity.

## Quality and Service

We are committed in providing the best quality product for customers need that will be backed up by 20 years of technical service experience.

At DFT, we are keen to support our customers in every phase of a project, from the inception of an idea or request, through recommendation and testing to launch and installation

# OUR SERVICE

We provide a complete service for your fluid technology needs, from installation to replacement of parts.

## Installation and Commissioning

We offer you with total service for installation & commissioning including mechanical, electrical, and piping works.

## Maintenance Service Contract

We offer you a service contract, should you need a continuous and total maintenance for your system.

## Maintenance Service

Our expert teams are ready to assist you to have system inspection after installation to assure that the system works properly.

## Recondition / Refurbishment

We provide refurbishment service to help optimizing the system in order to maximize productivity and revenue.

## Repair / Troubleshooting

In critical unscheduled breakdown, our experienced team is ready to assist you in finding the rootcause and solved it with our expertise.

## Spare Parts Supply

Our strategy in global networking enables us to provide our customer with original spare parts through fast and safe delivery.

# OUR CAPABILITIES

Our supporting technicians, service, and engineering team have a considerable amount of experiences and investment in fluid transfer system, hydraulic & lubrication system, cooling system, water monitoring system, flushing and tank cleaning. In search of lower investment cost, we offer you with our rental equipments that you can pay as you go.

**CONSULTATION, SELECTION,  
IMPLEMENTATION**

**OPTIMALIZATION &  
ENERGY SAVING**

**AFTER SALES SERVICE**

**FLUSHING SERVICE**

**FLUID CONDITION MONITORING**

# PROJECT DESCRIPTION AND COVERAGE

We offer a wide range of system solution, spare parts, and accessories. Our expert technical teams will assist you with comprehensive and a total services for:

- ✓ Industrial Pump
- ✓ Dosing Pump & Controllers
- ✓ Sealing
- ✓ Blower & Mixer
- ✓ Pump Accessories
- ✓ Flowmeter & Sensors
- ✓ Filtration System
- ✓ Oil & Biodiesel Management System
- ✓ Hydraulic and Lubrication System
- ✓ Hose, Fitting, Valve & Accessories
- ✓ Drive Shaft & Mechanical Equipment
- ✓ Electric Motor & Engine

# PROJECT HIGHLIGHT

## Challenge of the Project

In search of better investment cost, we try to introduce the customer with efficient and sustainable approach along with green and clean technology products available.

---

## Technical Support

In the condition of obsolete and frequently damaged custom pump parts, our technical team is ready to serve your spare parts requests in an emergency condition. This case need an adequate understanding and expertise to replace such critical parts.

---

## Energy Saving & Optimization

We initiate the customer to move into more efficient operation by transforming to a sustainable world. Emphasise on offering inteligent, energy saving products & digitalization operations.

# OUR BEST PRODUCT RANGE

Our broad experience and expertise has enabled us to build strong relationship with our leading international partners and manufacturers. We deliver strongest range of leading edge fluid technology products, brands, and technologies at competitive prices for Indonesia market.

## Dosing System & Controller

Provide complete set of dosing systems including pumps, controllers and accessories.

## Sealing Solution

Latty's complete sealing solution for your pump needs.

## Foot Valve, Blower & Mixer

Various kinds of foot valve, blowers and mixers from well-known brands for your needs.

## Filtration System

High quality filtering system for maximum clear results.

## Oil & Biodiesel Fuel Treatment

Reliable management system for long lasting biodiesel oil and fuel.

# OUR BEST PRODUCT RANGE

## Industrial Pump & Electric Motor

Provide wide range of Industrial pumps and electric motors with types, capacities and application.

## Hose, Pipe, Fitting, & Accessories

A wide variety of hoses, pipes and fittings are available for durable hydraulic systems.

## Driveshaft & Mechanical Component

The drive shafts and mechanical devices from GWB Dana are of undoubted quality.

# SOLUTION OUR PARTNER

We work with International brands to bring you the best products.

# INDUSTRIAL TOTAL SOLUTIONS
